Abstract Submission

Only 14 days left to [submit](#) your abstract for the opportunity to be a part of this exciting program. Deadline expires midnight AWST Sunday 10 June 2018.

Abstract submission sub-themes

- Cancer epidemiology
- Chronic Disease epidemiology
- Clinical epidemiology
- Environmental health (including climate change)
- Genetic epidemiology
- Health economics, health services and health systems
- Implementation science, translation from research to practice
- Infectious Disease epidemiology
- Mental health epidemiology (including cognitive functions; suicide)
- Methods, including field epidemiology; data linkage; analytic; machine learning; recruitment, data collection, surveillance, sharing, novel statistical analyses, ethics in the digital age
- Nutritional epidemiology
- Occupational epidemiology
- Others, including aging, lifestyle factors, addiction and/or substance use disorder, injury, affecting population of any ages
- Perinatal epidemiology
- Pharmacoepidemiology and precision medicine

For more information and to submit please click [here](#).

AEA Workshops

Call for Half-Day Workshops

The organising committee for the 2018 Australasian Epidemiological Association Annual Scientific Meeting (ASM) is calling for [workshop proposals](#).

The conference organising committee welcomes ideas for teams or individuals to conduct pre-conference workshops. Workshops are usually half-day workshops and will be delivered on 22nd October in Perth.

If you have an advanced epidemiological method or analytical approach, or other ideas related to the conference theme 'The Future of Epidemiology: Maximising our use of data', please [submit](#) your proposed workshop as listed below:

- click on the Submit and abstract button or the 'Abstracts tab' at the top of the page
- choose the Half Day Workshop submission
- title in less than 20 words
- a short 200-word paragraph of what you intend to deliver through the portal above. Please complete your submission by midnight AWST Sunday 10 June 2018.

If you have any questions please contact [Cara Maltman](#) at ASN Events.

Call for Early Career Research Workshop

The Australasian Epidemiological Association (AEA) is offering an early career researcher (ECR) to participate in a workshop at the Annual Scientific Meeting. The short workshop will allow ECR to present the problem encountered during the course of their research which needs resolution and discuss methodological issues with experienced epidemiologists and biostatisticians in an open forum.

Please note this workshop is not a forum for presentations of results.

If you work on areas related to the conference theme 'The Future of Epidemiology: Maximising our use of data',

- click on the Submit and abstract button or the 'Abstracts tab' at the top of the page
- choose the ECR Workshop submission
- title in less than 20 words
- a summary (500 words) of the methodological issue you encountered with a brief background to the problem, the context of the problem, methodological implications and what you intend to achieve. Please complete your submissions by midnight AWST Sunday 10 June 2018.

If you have any questions please contact [Cara Maltman](#) at ASN Events.

We look forward to seeing you in Fremantle!
