

## **Strategic Issues to address for each working group:**

### **Funding**

Provide recommendations on the following:

- Source of long term funding streams, ie. potential funding source, donors and financial partners

- Options and different level of running costs (i.e example of sustainable cost structure?)

### **Governance**

Determine and provide recommendation for an agreed governance arrangement

### **Ethics**

Provide information to address the following:

- Standardised Consent toolkit for Biobank (Broad-based consent form, consent for linking patient data)

- Privacy

- Ethics Defensible plan

- Consumer and public engagement

### **Quality Assurance**

Provide recommendations on the following:

- Determine SOP for specific sample collection, storage and testings.

### **Data management**

Provide specific recommendations on the following:

- LIMS for biospecimen related data (meta-data and participant data) and clinical data/Medical record

- How to harmonise and curate existing data?

### **Infrastructure**

Provide specific recommendations for:

- Space (Where)

- Equipments (storage and sample processing)

- Staff
