<https://clinical-trials-8-february-2019.eventbrite.com.au>

**Who should attend?**

Medical registrars, nurse practitioners, allied health professionals, palliative care physicians, clinical researchers, and any other health professional interested in cancer symptom management research.

**Overview**

Cancer Symptom Trials (CST) is one of fourteen Cancer Cooperative Trials Groups (CCTGs) funded by Cancer Australia.

Through our clinical trials, we research options for improved management of symptoms that can occur due to a cancer diagnosis and related treatments. Our goal is to ensure the best quality of life possible for people with cancer. We acknowledge the significant role that carers play in the lives of people with cancer. We welcome their inclusion and participation in our research.

In collaboration with Cancer Council WA and Palliative Care Clinical Studies Collaborative (PaCCSC), we are running a workshop to introduce cancer symptom management clinical trials to new or experienced researchers.

**Symptoms of Focus**

- Pain
- Fatigue
- Breathlessness
- Appetite & Cachexia
- Nausea
- Cognitive & Neurological Disorders
- Gut Dysfunction

**Presented By**

Professor Jane Phillips, Professor of Palliative Nursing and Director of Improving Palliative, Aged and Chronic Care through Clinical Research and Translation (IMPACCT), University of Technology Sydney

Professor Meera Agar, Professor of Palliative Medicine, University of Technology Sydney
